ONE NETWORK, together with our partner client, is looking for a **SOFTWARE ENGINEER** to join an elite group of engineers on an ongoing, **permanent** basis.

We are a team of creative, motivated and results-oriented people who love what we do. Our client is a highly regarded ASX listed company who delivers world-class customer services and brilliant Australian holiday experiences, as well as a transportation network across Australia and internationally, in Singapore and London. We pride ourselves on our drive to provide innovative and first-class solutions to our customers and we're excited to have an addition to our team.

We not only care about being the best in our industry, we also care about our people. We offer **excellent employee benefits** and **flexible working conditions**. If you are a skilled developer, have a grasp of design fundamentals, the ability to give great feedback, and an eye for the smallest of details, then this may be for you!

What will you be doing?

- Designing, developing and testing the software for our in-house booking platform and customer platforms.
- Championing the use of agile methodology
- Ensuring codes are well-reviewed and providing feedback to peers
- Providing accurate estimates on development tasks and proactively communicate potential delays
- Collaborating with cross-business stakeholders

Who are we looking for?

- People who have a 'can do' attitude, excellent planning, communication and problem-

solving skills.

- Must have competency with development within an enterprise software platform
- Must be knowledgeable in Cloud Service (Amazon Web Services) development and deployment
- Adelaide-based preferred

What type of experience will you have?

- You will have at least **5+ years** of commercial experience as a **software developer**
- Experience in object-oriented Ruby and, in particular, **Ruby on Rails**
- Knowledgeable in **API design and development**, particularly with **JSON:API**
- Fluency in database technologies, including MySQL and Redis
- Proficiency with web fundamentals such as HTML, JavaScript and CSS/CSS pre-processors
- Proficiency with **JavaScript frameworks** such as React, ES 6-7 and associated build chain (Webpack, etc.)
- Proficiency with **Front-end (CSS) frameworks** like Bootstrap, Foundation, or Tailwind
- Master of **Git** and centralised services such as BitBucket, GitHub, etc.

Why you will enjoy Mondays again:

- Choose the laptop you like. MacBook and Thinkpad are our favourite.
- We are coffee lovers and we hope you enjoy it too. There is a coffee machine in the office so feel free to brew your own;
- **You have the option to work from home** for up to 2 days a week, which should make it easier to look after your kids or pets;
- **Employee benefits** of \$1,000 per year or 25% discount on any company products;
- Chance to work at the heart of the CBD in Adelaide with our knowledgeable, high-achieving, and fun team.

Nice to have:

Growth mindset:

- We are learning machines; always eager, curious & open-minded, we hope you're someone who also has a hunger for continuous learning and professional development
- We take on 'radical ownership', e.g. "What could I have done differently or better?"
- Driven to hit goals as part of a high-performing team
- When you work for us, you join a team of dedicated professionals who look for new ways to raise the bar

Awesome to work with:

- We work hard, and we party harder! We hope you are someone who can join in the team fun and enjoys working with a team. See you at happy hour!

If this sounds like an exciting opportunity, we'd love to talk more with you. Click 'Apply' now.

Employer questions

Your application will include the following questions:

How many years' experience do you have in a software development role?
